MTF CDR Toolkit - Operations Reference & QA Guide

Complete End-to-End Workflow Diagram & QA Troubleshooting Matrix

END-TO-END DATA WORKFLOW PIPELINE

1. Raw Dialer CSV	-> Raw export from dialer containing all call legs
2. Tool #4 (Answer Null)	-> Isolate answered calls with missing CRM status
3. Tool #5 (Lead Formatter)	-> Map to 57-column CRM re-upload template
4. Tool #1 (Remark Adder)	-> Add QA/Agent remarks to Interested leads
5. Tool #2 -> Tool #3	-> Convert to JSON payload and POST to CRM API
6. Tool #6 (Pivot & Stats)	-> Generate Connectivity % and WhatsApp report card

QA CHECKLIST & TROUBLESHOOTING MATRIX:

Observed Issue	Root Cause	Recommended Action
Columns not found error	File header names differ from expected names	Verify CAMPAIGN NAME, CRM SUB-DISPOSITION, RECORD ID
No rows matched filter	Campaign name spelling or case mismatch	Ensure campaign is exact match to MTF-CROSS SELL
Extra IDs warned in Tool #1	Pasted Lead IDs do not belong to filtered set	Double-check if lead IDs belong to the same campaign date
JSON shows empty sub_disp	Checkbox 'Include empty sub_disposition' off	Check the box in Tool #2 if null remarks are required
API Error 400 (Private IP)	Endpoint URL points to localhost or private IP	Use public HTTPS domain; SSRF protection blocks local IPs
Screenshot Ctrl+V not working	Browser permission denied for clipboard write	Click 'Download screenshot (PNG)' button to save directly
